sull'uso di Sostanze Chimiche di tipo Per-e-Poli- FluoroAlchiliche (PFAS) ai sensi dell'Inventario delle Sostanze Chimiche del TSCA¹

for the use of Chemical Substances, type Per-and-Poly- FluoroAlkyl Substances (PFAS) under TSCA Inventory of Chemical Substances¹

n°: 001/2026.

“

Informazioni di base sul TSCA: A partire dal 1^a gennaio 1977, il *Toxic Substances Control Act* (TSCA) richiede all'*Environmental Protection Agency* (EPA) di ottenere informazioni su tutte le sostanze chimiche nuove ed esistenti e di controllarle tramite restrizioni e misure normative, qualsiasi sostanza ritenuta in grado di causare “un rischio irragionevole per la salute pubblica o l'ambiente”.

Inoltre, il TSCA gestisce l'inventario TSCA delle sostanze chimiche (*the TSCA Inventory of Chemical Substances*), un elenco esaustivo contenente tutte le sostanze chimiche esistenti importate, prodotte o trasformate negli Stati Uniti che non rientrano nei requisiti per un'esenzione o un'esclusione ai sensi del TSCA. Inizialmente pubblicato nel 1979, “l'Inventario” (“*The Inventory*”) ora comprende oltre 86.000 sostanze chimiche denominate “sostanze chimiche esistenti” (le sostanze chimiche non elencate sono denominate nuove sostanze chimiche).

Per ottenere la conformità al TSCA, i produttori (inclusi gli importatori) soggetti alla norma devono presentare un ampio spettro di informazioni su ciascun composto PFAS (sostanze *Per-e-Poli-FluoroAlchiliche*) da loro prodotto (nella misura in cui è noto o ragionevolmente accessibile).

”/

“

TSCA Background: Effective January 1, 1977, the *Toxic Substances Control Act* (TSCA) requires the *Environmental Protection Agency* (EPA) to obtain information on all new and existing chemicals and to control them through restrictions and regulatory measures any substance determined to cause “unreasonable risk to public health or the environment.”

Additionally, the Act manages the *TSCA Inventory of Chemical Substances*, an exhaustive list containing all existing chemicals imported, manufactured, or processed in the United States that do not qualify for an exemption or exclusion under the TSCA. Initially published in 1979, “*The Inventory*” now consists of more than 86,000 chemicals referred to as “existing chemicals” (chemicals not listed are referred to as new chemicals).

To achieve TSCA compliance, manufacturers (including importers) subject to the rule must submit a broad spectrum of information about each PFAS (*Per-and-Poly-FluoroAlkyl Substances*) compound they manufactured (to the extent it is known or reasonably affordable).
